Profile

I am experienced with the latest cutting-edge development tools and procedures. Able to effectively self-manage during independent projects and collaborate as part of a productive team. Proficient in various languages, and embedded systems. I am very innovative and love continuously expanding my knowledge with multiple languages.

Technical Skills

Frontend: **HTML5, CSS, Javascript, Bootstrap, Git, Github, NodeJs, React, PrimeFlex, PrimeReact, Agile Development, Jquery**

Projects

React Portfolio
Repo: https://github.com/KaleimS/Kaleim-s-React-Portfolio-Project
Deployed: https://kaleims-react-portfolio.netlify.app/

- *This was one of my first react projects which allowed me to explore various technologies and ways to implement new concepts such as react router dom which was very enjoyable to understand and learn.*
- Languages: **HTML, CSS, NodeJS, React, Git Version Control**

Professional Readme Generator |
Repo: https://github.com/KaleimS/Professional-README-Generator
Deployed: No live demo check repo readme for more information

- *This is one of my favourite projects as it is useful for any new project I start, it features a dynamically updateable markdown file that asks you prompts about your project and then dynamically creates a readme for a specific project you may be working on.*
- *The readme includes two different videos explaining how to use the readme generator.*
- Languages: **HTML, CSS, NodeJS Git Version Control**

Bootstrap Portfolio |
Repo: *https://github.com/KaleimS/Bootstrap-Portfolio*
Deployed: *https://kaleims.github.io/Bootstrap-Portfolio/*

- *This project is my first time using Bootstrap to create a Responsive Portfolio.*
- *It is my first Bootstrap project, so I spent a lot of time doing extra research to better represent of what I wanted to achieve.*
- Languages: **HTML, CSS, Bootstrap, Git Version Control**

First Portfolio |
Repo: https://github.com/KaleimS/Kaleim-Portfolio
Deployed: https://kaleims.github.io/Kaleim-Portfolio/

- *This project was my first chance to see what I could create from scratch.*
- *I spent a lot of time with responsiveness and trying to create something functional with CSS Grid*
- Languages: **HTML, CSS, Git Version Control**
